

TIRED OF PAYING BIG MONEY FOR E-DISCOVERY?

ARE YOU FRUSTRATED WITH **NON-RESPONSIVENESS**, MISSED **DEADLINES**, COSTS THAT **ESCALATE WITHOUT NOTICE**, **INFERIOR WORK** PRODUCT, AND EXPERT **WITNESSES** THAT **CAN'T COMMUNICATE** EFFECTIVELY WITH A JURY?

Maybe it's time to think small -- to consider a small boutique firm with over a decade of experience and a national reputation for integrity, service, and professionalism.

Maybe it's time to choose a company that gives the same careful attention to each client and every case, no matter how big or small.

Maybe it's time to choose Sensei Enterprises.

Sensei Enterprises, Inc. provides experienced computer forensics and information technology support to corporations and litigators nationwide. Founded in 1997, the company has grown to include a staff of experienced technology professionals, all with a proven track record of excellence in electronic evidence recovery, analysis, and expert testimony. Our rates are reasonable, our people certified, and once a client becomes a client, they usually stay a client.

You've probably already learned that bigger isn't always better, and as a general rule, large computer forensics firms charge more. After all, they have to – companies that spend millions on advertising and overhead have to get that money back somewhere. But if you'd rather get what you pay for (and only pay for the service you get), consider the experts at Sensei.

The company's founders, Sharon D. Nelson, Esq. and John W. Simek, are acknowledged experts in the field, and are often on the road educating audiences across the country about technology issues for the legal profession, including the value of computer forensics. They have also written articles about technology and the law for many publications, and even co-authored several books, including *The Electronic Evidence and Discovery Handbook* (ABA, 2006). Ms. Nelson also writes a leading technology blog, *Ride the Lightning*, that explores the changing world of electronic evidence.

When defense counsel needed expertise they could trust to provide cell phone forensics in the Duke Lacrosse rape case and computer forensics in the Washington Sniper case, they chose Sensei. When you need expert assistance in finding the hidden information you need to help win your next case, we hope you will do the same.

For more information about how Sensei can help you bring the truth to light (with the kind of one-on-one service big companies rarely provide), call 703.359.0700, or visit www.senseient.com.
