

FOR IMMEDIATE RELEASE

AMERICAN BAR ASSOCIATION RELEASES 2009 LEGAL TECHNOLOGY GUIDE

New Book Helps Solo Practitioners and Small Firms Choose The Right Technology for Them

Sharon D. Nelson, Esq. and John W. Simek, President and Vice President of Sensei Enterprises, Inc., a computer forensics and information technology firm in Fairfax, Virginia, have recently released The 2009 Solo and Small Firm Legal Technology Guide: Critical Decisions Made Simple.

Published by the American Bar Association and written in collaboration with Michael Maschke, Sensei's Director of Computer Forensics, the second edition of this annual guide offers the latest information and recommendations on computers, servers, networking equipment, legal software, printers, security products, smart phones, and anything a single lawyer or a small law office might need.

Bruce L. Dorner, an attorney in Londonderry, NH, was impressed with how helpful the book was in narrowing down what works and what doesn't work for solo practitioners and small firms. "Selecting the right computers, peripheral equipment, software, support tools and services can drive a sane attorney over the edge," he said. "For those who are trying to wrap their arms around the technology giant, this is a tremendous resource to consult before you take your credit card out of your wallet and ask, 'am I making the right choice?'"

Specific issues covered in the Legal Technology Guide include:

- A complete, unbiased overview of current legal technology products
- Step-by-step instructions for making sound technology decisions
- How to choose the right operating system and software for your office, including case management applications, billing systems, and document management solutions
- Determine what you need to go wireless
- How to protect your firm from security threats, including viruses, spyware, and spam

The book is priced at \$84.95 (\$54.95 for members of the ABA's Law Practice Management Section) and is available through the ABA's web site store at <http://www.abanet.org>.
